

## **First website assignment**

### **Creating a file on your desktop.**

- Create a folder on the desktop app named Ian's web development.
- Inside the folder, create a file called index.html
- Open the file on your editor e.g notepad or visual studio code.

Website task:

Create a website titled "My Hobby" with 2 paragraphs describing the hobby.

Features of the website:

1. Use a background image of your choice, remember to style it.
2. Use list element to state at least 5 hobbies.
3. For the paragraphs describing hobbies, style the first paragraph with the color of your choice.
4. Use the header tag for the title of the website.
5. Style the header using a font and color of your choice.
6. Format your work with different style of your choice from the learning website.
7. Insert a website link of your favorite hobby.
8. Insert 2 images of your favorite hobby: Rem to format the images to appear properly on the page.

NB: You are free to use any text editor, Visual studio code, notepad, sublime text.

Remember to save your file with .html extension and in the right folder.

Make the website look lively!

All the best!
